**About Moderate**

**Aims to balance the level of long-term growth potential and investment risk**

Invests in a mix of defensive assets such as enhanced cash and fixed income and growth assets like shares and property, with a small exposure to alternative investments (such as private equity) and infrastructure.

**Who is Moderate suitable for?**

Suitable for people who wish to invest their super for three years or more.

A portion of the international investments in this investment option are hedged. Currency hedging, which involves selling the international currency and buying the Australian dollar, reduces the currency volatility of this option's international investments.

**What's the investment return objective?**

Achieve a return exceeding the increase in the Consumer Price Index (CPI) by at least 2.5% pa, after tax and investment costs, over any 10 year period.

**What's the minimum time you should invest in Moderate?**

At least three years.

**Moderate's Standard Risk Measure^**

Moderate's risk level is medium to high. The estimated number of annual negative returns over any 20 year period is 3 to less than 4. These negative returns can be experienced several years apart or several years in a row within the 20 year period.

## How has Moderate performed?

### What to look for in investment performance?

As Moderate invests in a mix of defensive and growth assets, investors should expect moderate long-term returns with lower risk, but with the chance of some low or even negative returns in some years. Short-term performance can vary. Generally, it's important to focus on long-term performance and your investment time frame.

**\* Past performance isn't necessarily an indication of future performance.**

<sup>^</sup> We've measured risk using the super industry's Standard Risk Measure so you can compare investment options between different funds. The Standard Risk Measure describes risk based on the number of negative annual returns expected over any 20 year period. It's calculated using a simulated model that takes into account factors that may affect returns. This isn't a complete assessment of investment risk, as it doesn't show the size of negative returns, whether you'll meet your investment objective or the impact of fees and taxes on your returns. You need to be comfortable with the risk and potential losses of your chosen investment options. Visit [teamsuper.com](https://teamsuper.com) for more information about the Standard Risk Measure, the Trustee's risk assessment methodology and other types of investment risk.
